

FOOD SAFETY POLICY

WIP Sp. z o.o. is a manufacturer of PET preforms and HDPE caps for bottles intended for food packaging. Production takes place in Aleksandrów Kujawski at two manufacturing plants: at 3a Przemysłowa Street and on Wschodnia Street. Our goal is to earn our customers' trust and ensure that our products:

- ✓ meet our customers' requirements,
- ✓ comply with the currently applicable legal requirements for packaging intended to come into contact with food,
- ✓ are safe for human health.

We achieve the above objectives by:

- Using raw materials and supplies that meet food safety requirements,
- Ongoing monitoring of suppliers of materials and services,
- Expanding the product range in line with customer requirements,
- Efficient service, timely and flexible deliveries,
- Continuously improving employees' qualifications and awareness in the area of food safety, through conducting training in food safety and food safety culture,
- Improving infrastructure resources and production technology,
- Effective internal and external communication aimed at exchanging information about hazards to product safety in the food chain,
- Complying with applicable legal requirements.

The tool for effective implementation of this Policy is:

- An implemented food safety management system in accordance with ISO 22000, optimally tailored to our operations, the effectiveness and efficiency of which will be systematically monitored and improved,
- Documented, implemented and observed Good Manufacturing Practice (GMP), as well as Good Hygiene Practice (GHP),
- improving food safety culture.

The Company's Management Board provides the resources necessary for the effective operation of the food safety management system, declares its full commitment to producing safe products and, at the same time, obliges all employees to apply and comply with the above principles.

President of the Management Board
